

PROFESSIONAL SUMMARY

Hands-on Engineer & Team Lead with experience **building and delivering production-grade**, cloud-native applications in enterprise environments. Strong background across backend services, **AWS** cloud infrastructure, **CI/CD**, and API integrations, with **ownership** from development through production. Seeking a product-focused engineering role in London (**No visa required**)

WORK EXPERIENCE

Accenture – DevOps & Automation Engineer

Sept 2023 – Present

- **Recognized as Accenture Ireland's nominee for the 'National Graduate of the Year' award (2024/2025)**, reflecting sustained delivery, technical leadership, and impact on a large-scale client platform
- **Leading the design and delivery of CI/CD pipelines** to support the transformation of a legacy monolithic website into a scalable, microservice-based architecture using Next.js, **reducing production deployment time from hours/days to under 20 minutes** while significantly improving release stability
- **Owning end-to-end build and release workflows** across multiple services, leveraging AWS, Jenkins, ArgoCD, and GitHub Actions to enable reliable, repeatable, and rapid deployments in production environments
- **Designing, operating, and evolving Kubernetes-based microservice environments** on AWS, ensuring scalability, performance, and security across cloud-native applications
- **Acting as a key technical delivery point across development, QA, and product teams**, shaping release strategies and coordinating deployments within Agile delivery cycles, contributing directly to increased online sales for the client
- **Designing and integrating GenAI-powered services** using **Amazon Bedrock** within production systems, including prompt orchestration, response handling, and integration with existing cloud-native workflows
- **Driving Infrastructure as Code adoption** using **Terraform** and **AWS CloudFormation**, establishing version-controlled, reusable infrastructure patterns and improving consistency and reliability across multiple environments
- **Providing technical guidance** and hands-on support to other engineers during cloud migrations, GenAI integrations, and production releases, ensuring delivery quality and platform stability
- **AWS Certified Cloud Practitioner** (March 2024), with applied, production experience across cloud architecture, security best practices, and distributed system design

Good Travel Software – Data Analyst

May 2023 – Jun 2023

- Analyzed and transformed large datasets using Python to generate actionable business insights and support decision-making
- Performed data extraction, cleansing, and exploratory analysis to identify trends, patterns, and anomalies
- Collaborated with engineers and stakeholders to deliver data-driven improvements to internal processes

WeHelpWildlife (Dublin-based Wildlife Rescue Charity) – Software Developer

Oct 2022 – Apr 2023

- Designed and built a **full-stack mobile application and web-based dashboard** for a wildlife rescue charity as part of my final-year project, supporting operational workflows and data visibility
- Developed frontend functionality using **React and React Native**, delivering a usable, production-ready application
- Implemented backend services using **Google Firebase**, enabling real-time data synchronization and authentication

Self - Employed – Tutor & Music Teacher

Sep 2016 – Present

- Tutoring several students, both Junior & Leaving Cert in a range of subjects - Maths, Applied Maths, Physics, Accounting
- Tutoring several young students in both piano and guitar, following RIAM musical grades.

EDUCATION

University College Dublin, UCD

April 2024 – July 2024

Professional Certificate of Data Analytics: Machine Learning

- Applied machine learning techniques using **Python** and **scikit-learn**, including data preprocessing, model selection, and hyperparameter tuning.
- Worked with **neural networks and deep learning concepts**, alongside advanced data visualization using **matplotlib** and **Bokeh**.

Trinity College Dublin

Sep 2019 – May 2023

B.A. Management Science & Information System Studies (MSISS)

- Graduated with First Class Honours (**1.1**)
- Relevant modules: **Programming** (Python, SQL, Java, React Native, Flutter), Statistical Analysis, **Data Analytics**, **Applied Probability**, Finance, Derivatives, Accounting, Economics, Engineering Mathematics, Decision Analysis, Management Science
- **Naughton Foundation Scholarship** recipient for STEM excellence

AWARDS & ACHIEVEMENTS

Academics

- Completed **Harvard Business School – Credential of Readiness (CORE)** in Business Analytics, Economics & Financial Accounting

Music

- Grade 8 (Highest Grade) Piano with Honours (Royal Irish Academy of Music)
- Self-taught Guitar to teaching level

Sport

- **Elite amateur-level Gaelic Football** player, multiple-time Kildare Senior Championship winner
- Represented **Kildare County** in Gaelic Football and Hurling at underage levels
- **Dublin Marathon finisher (2025)** – finishing time 3 hours 19 mins
- Accomplished golfer, current playing handicap – 9
